

Industrial Machinery Nozzle CN040

This precision nozzle is designed for industrial machinery applications. It features a spring-loaded mechanism and conical tip for accurate dispensing.

Product Overview

Precision Nozzle for Industrial Applications

The CN040 industrial nozzle is a precision-engineered component designed for high-performance pick-up and placement tasks. Featuring a robust construction, this nozzle ensures consistent performance and reliability in demanding industrial environments. Its conical tip design allows for accurate handling, making it an essential replacement part for professional automated machinery.

Technical Specifications

Model Identifier	CN040
Tip Dimensions	0.75mm outer diameter / 0.38mm inner diameter

Compatibility

Available Nozzle Types

- TN series: TN03, TN04, TN65, TN14, TN22, TN40, TN75, TN110
- CN series: CN030, CN040, CN065, CN140, CN220, CN400N, CN750, CN1100

Compatible Series	CP45 Series
