

Industrial Magnetizer

This industrial magnetizer is designed for efficient material magnetization. It features a multi-cabinet design with digital readouts and mobile casters for reliable performance.

Overview

Industrial Magnetizer Overview

This industrial magnetizer is a robust, high-performance solution designed for the efficient magnetization of various magnetic materials, motors, and loudspeakers. Built with advanced electrical components and a sophisticated cooling system, it supports continuous operation and delivers reliable, consistent results. The unit features a multi-cabinet design with integrated control panels for precise operation and is mounted on casters for enhanced mobility in industrial environments.

Technical Specifications

Circulation Time

- 1 second
- 45 seconds

Cooling System

Forced Air, Liquid (Water/Oil)

Compatible Fixtures

Standard Solenoid, Multi-pole, Radial, Special Arrangements

Logistics & Services

Available Transport

Method	Advantage	Delivery Time
Express (FedEx/UPS/DHL)	Fast, Door-to-door	7-10 days
Air Transportation	Fast, Cost-effective	8-12 days
Sea Transportation	Economical	Slow

Packaging

Wooden cases
