

Industrial Material Suction and Delivery Hose

This hardwall hose is specifically designed for suction and delivery of dry materials such as cement and sand. It features excellent rebound, durability, and abrasion resistance.

Overview

Industrial Material Suction and Delivery Hose

This heavy-duty industrial rubber hose is engineered for demanding suction and delivery applications in rigorous environments. Featuring a robust construction with reinforced layers, it offers superior durability and resistance to abrasion, chemicals, and high pressure. It is an ideal solution for critical operations in sectors such as underground mining and large-scale construction.

Performance Metrics

Rated Working Pressure

150 PSI

Working Pressure

Construction & Durability

Key Features

Abrasion Resistant, Chemical Resistant, High-Pressure Rated, Heavy-Duty Construction

Applications

Recommended Use Cases

- Underground Mining
- Construction Sites
- Industrial Material Handling
