

Industrial Parts Washer with Recirculating Pump

This parts washer is designed for industrial and automotive applications, providing a robust cleaning solution for large parts. Its recirculating solvent pump delivers a continuous flow of cleaning solution through a flexible spigot, ensuring thorough degreasing and grime removal.

Overview

Industrial Cleaning Solution

The APW40 parts washer is a robust and efficient cleaning solution designed for demanding industrial and automotive applications. Featuring a deep basin with a hinged lid, it provides ample space for cleaning large mechanical components like engines, transmissions, and brakes. Its heavy-gauge steel construction with a powder-coated finish ensures superior durability and corrosion resistance in tough workshop environments.

Performance & Features

Cleaning System	Recirculating solvent pump with flexible spigot
Storage	Integrated lower shelf for tools and supplies
Ideal Applications	Engine cleaning, Transmission repair, Brake maintenance, Industrial degreasing

Construction & Design

Build Quality

- Heavy-gauge steel construction
- Powder-coated finish
- Corrosion resistant
- Hinged lid design
