

Industrial Pipeline Gate Valve

This gate valve is designed for controlling fluid flow in pipelines. It features a robust construction with flanged connections for secure installation in water, oil, and gas applications.

Product Overview

Industrial Pipeline Gate Valve

This industrial gate valve is engineered for robust fluid flow control in demanding pipeline environments. Designed with secure flanged connections, it ensures reliable installation and performance across water, oil, and gas infrastructure. It provides essential shut-off and throttling capabilities to maintain operational integrity.

Technical Specifications

Nominal Pressure

16 PN

Pressure Rating

Nominal Diameter

50 DN

Diameter

Model Number

MN-10

Key Features

Connection Type

Flanged Connection

Capabilities

- Reliable shut-off
- Flow throttling
- Robust construction

Suitable Industries

Water Treatment, Oil & Gas, Industrial Pipelines
