

Industrial Plant Equipment Export

We provide comprehensive solutions for industrial plant equipment export. Our services include equipment procurement, civil engineering, and technical training for maintenance and operation.

Kyunchaung Plant in Myanmar

Overview

Comprehensive Industrial Processing Solutions

This industrial plant equipment offers a complete, integrated solution for large-scale processing operations, such as oil, gas, or chemical manufacturing. The system features a robust, interconnected network of storage tanks, distillation columns, reactors, and heat exchangers designed for high-capacity output. Engineered for reliability and efficient distribution, this infrastructure supports complex operational requirements in diverse environmental conditions.

Technical Infrastructure

Core Equipment Components

- Large-scale cylindrical storage tanks
- Distillation columns
- Chemical reactors
- Heat exchangers
- Integrated piping and valve distribution networks

Operational Focus

Oil and Gas, Chemical Processing, LPG Distribution

Project Application

Myanmar LPG Project
