

Industrial Plate Ice Machine

This plate ice machine is designed for industrial refrigeration purposes. It features a robust frame, large heat exchanger, and powerful compressor for efficient ice production.

Zhejiang Qifeng Refrigeration Equipment Manufacturing Co., Ltd

Product Overview

Industrial-Grade Ice Production

This industrial plate ice machine is engineered for high-capacity cooling and preservation needs across sectors like food processing, fishery, and concrete cooling. It utilizes a sophisticated microcomputer control system to monitor operations, ensuring energy efficiency and ease of use. The resulting ice is characterized by its dry, hard, and transparent texture, making it ideal for demanding industrial applications.

Performance Specifications

Daily Production Capacity

1 tons

Minimum Output

200 tons

Maximum Output

Ice Thickness Range

6mm - 20mm

Technical Features

Control Interface

Microcomputer control with text display

Ice Properties

Dry, Hard, Transparent, Irregular Shape

Applications

Suitable Industries

- Supermarkets
- Production Processing
- Pelagic Fishery
- Vegetable/Fruit Processing
- Meat Processing
- Concrete Cooling
- Chemical Industry
