

# Industrial Polishing Machine for Metal and Mold Finishing

This industrial polishing machine is designed for use in nail, craft carving, and mold polishing applications. It is also suitable for denture and artificial limb polishing.

## Product Overview

### Industrial Precision Polishing

The JD8500B is a high-performance industrial polishing machine engineered for precision surface finishing tasks. Designed for versatility, this robust unit features variable speed control and an ergonomic handpiece to ensure consistent, high-quality results across diverse materials. With integrated foot pedal operation and multiple control modes, it provides the efficiency and control required for demanding industrial applications.

## Applications

### Primary Applications

Mould Polishing, Denture Polishing, Artificial Limb Finishing, Craft Carving, Nail Care

## Technical Features

### Control Features

- Variable Speed Control
- Forward/Reverse Rotation
- Hands-free Foot Pedal Operation
- Ergonomic Handpiece Design

### Model Number

JD8500B
