Product Overview

Industrial Polycarbonate Plates

Known as the 'king of transparent plastics,' these polycarbonate plates are high-performance engineering plastics offering outstanding physical, mechanical, electrical, and thermal properties. They serve as a durable, lightweight alternative to glass and acrylic, making them ideal for demanding industrial environments. Our plates are customizable in thickness and size to meet specific project requirements.

Material Characteristics

Material Type	Polycarbonate (PC)
Key Properties	Impact Resistant, Transparent, Weatherable, Durable, Lightweight

Application Areas

Available Types

- Sunshine board
- Endurance board

Common Applications

- Interior decoration
- Lampshades
- Advertising boards
- Screens
- Machinery equipment covers
- Protective structural elements
