

Industrial Push Button Switch

Industrial push button switches are used for control panels and machinery. They come in various colors and shapes, including illuminated, selector, emergency stop, and key-operated types.

Product Overview

Versatile Industrial Control

The LA39 series represents a robust solution for diverse industrial control panel and machinery applications. These switches are engineered for reliability in demanding environments, offering clear operational feedback and consistent performance. With a wide variety of configurations including illuminated, selector, and emergency stop options, they provide a comprehensive solution for modern process automation and safety systems.

Technical Specifications

Series Model	LA39
Available Variants	Illuminated Pushbutton, Selector Switch, Emergency Stop, Key-operated Switch

Design Options

Colors

Red • Green • Blue • Black

Available Shapes

- Round
- Square

Application Areas

Primary Applications

- Machine Control
- Process Automation
- Safety Systems
