

Industrial Refrigerated Air Dryer

This refrigerated air dryer is designed for industrial applications. It removes moisture from compressed air to ensure optimal performance and longevity of pneumatic tools and equipment.

Product Overview

Industrial Refrigerated Air Dryer

This industrial refrigerated air dryer is engineered to efficiently remove moisture from compressed air systems, protecting your pneumatic tools and equipment from corrosion and damage. Designed for robust operation, the unit features precise pressure monitoring and intuitive controls to ensure consistent performance in demanding industrial environments. It provides a reliable solution for maintaining clean, dry air quality essential for optimal production efficiency.

Technical Specifications

Equipment Type

Refrigerated • Industrial

Model Number

ED-30F

Key Performance Metrics

Core Performance

30 F

Capacity Class

Features

Key Features

- Robust industrial construction
- Integrated precise pressure gauges
- User-friendly control interface
- Efficient moisture removal technology
