

Industrial Refrigeration Compressor Unit

This robust refrigeration compressor unit is designed for industrial cooling and ventilation applications. It features a stainless steel pump head with a flanged connection and is powered by an efficient electric motor.

Product Overview

Industrial-Grade Reliability

This industrial refrigeration compressor unit is engineered for demanding cooling and ventilation environments. Featuring a high-durability stainless steel pump head and an integrated electric motor with advanced cooling fins, it ensures efficient heat dissipation and sustained operational performance. The unit is securely mounted on a robust metal frame to facilitate quick and stable installation in diverse industrial systems.

Technical Specifications

Key Components

- Stainless steel pump head
- High-efficiency blue electric motor
- Integrated cooling fins
- Metal support frame

Connection Type	Flanged connection
Certification and Features	Industrial Grade, Heat Dissipation Optimized, Stable Frame Mounting
