

Industrial Revolving Warning Light

The 330C revolving warning light is constructed from durable ABS plastic. It is designed for industrial and machinery applications.

Overview

Industrial Revolving Warning Light

The 330C revolving warning light is a robust signaling solution engineered specifically for industrial environments and machinery applications. Constructed from durable ABS plastic, this unit is built to withstand demanding operational conditions. Its compact yet highly visible design ensures effective hazard warnings in busy manufacturing or warehouse settings.

Physical Specifications

Material	ABS Plastic
Diameter	180 mm
Height	140 mm

Logistics

Packaging Details

Metric	Value
Quantity per Package	24 Sets
Gross Weight	14.5 kg
Packing Dimensions	52.5 x 41 x 45 cm

Application

Primary Application	Industrial, Machinery, Revolving Light
