

Industrial Rotary Vane Pump

This is a positive displacement rotary vane pump designed for industrial applications. It features a robust construction with a multi-vane rotor and includes a mounting base for secure installation and inlet/outlet ports for fluid connections.

Product Overview

Industrial Rotary Vane Pump

This positive displacement rotary vane pump is engineered for demanding industrial environments requiring consistent and reliable fluid handling. Built with a robust housing and a multi-vane rotor, it ensures long-term operational efficiency. The unit is equipped with a dedicated mounting base for secure installation and standardized inlet/outlet ports to facilitate seamless integration into existing industrial processes.

Technical Specifications

Pump Mechanism	Positive Displacement Rotary Vane
Mounting Type	Integrated mounting base
Key Design Features	Multi-vane rotor, Industrial grade housing, Secure mounting base
