

Industrial Safety Helmet

This safety helmet is made from high-density polyethylene (HDPE) for exceptional impact resistance. It features an adjustable suspension system and ventilation slots for comfortable, extended wear.

Overview

Industrial Safety Helmet HM501

The HM501 helmet is a robust and reliable head protection device designed for various industrial and construction applications. Constructed from high-density polyethylene (HDPE), the helmet offers exceptional impact resistance and durability while maintaining a lightweight profile for extended wear. It features an adjustable suspension system for a secure fit and ventilation slots to promote airflow, ensuring comfort in demanding work environments.

Technical Specifications

Electrical Hazard Protection

20000 V

Voltage Rating

Material	High-Density Polyethylene (HDPE)
Safety Standards	ANSI Z89.1 Type I, Class E

Features

Key Features

- Adjustable suspension system
- Ventilation slots for breathability
- Lightweight design
- Easy-to-clean shell
