

Industrial Sewing Machine for Apparel and Shoe Manufacturing

This industrial sewing machine is designed for manufacturing garments, shoes, and accessories. It features high-speed operation and precise stitching capabilities for various materials.

Product Overview

High-Performance Industrial Sewing Solution

This industrial sewing machine is engineered specifically for the rigorous demands of apparel, shoe, and accessory manufacturing. Designed for high-speed operation and consistent, precise stitching, it ensures reliability across a variety of textile applications. Its durable construction makes it an essential asset for professional production environments requiring efficiency and quality.

Technical Specifications

Model Identifier	TY-618
Primary Applications	Apparel Manufacturing, Shoe Production, Textile Accessories

Safety & Compliance
