

Industrial Sewing Machine for Heavy Fabrics

This heavy-duty industrial sewing machine is designed for robust textile manufacturing. It features a durable metal frame, integrated lubrication, and adjustable stitch length for handling thick materials like leather and canvas.

Product Overview

Industrial Heavy-Duty Sewing Solution

Engineered for demanding production environments, this industrial sewing machine excels at handling thick materials such as leather and canvas. The robust metal frame ensures structural stability, while the high-torque motor provides consistent performance for heavy-duty stitching tasks. Featuring an integrated lubrication system and a large capacity bobbin, this machine is designed to minimize wear and improve operational efficiency for manufacturers.

Technical Specifications

Key Features

- Large capacity bobbin
- Adjustable stitch length
- High-torque motor
- Integrated lubrication system

Compatible Materials

Leather, Canvas, Heavy Textiles
