

Industrial Sewing Machine Head

This industrial sewing machine head is designed for fabric feeding and stitching. It features a needle, presser foot, and feed dog mechanism.

Product Overview

Industrial Precision Sewing Head

This industrial sewing machine head is engineered for high-performance apparel and textile production. Featuring a robust needle bar, precise thread tensioners, and a heavy-duty feed dog mechanism, it is designed to handle demanding stitching tasks with consistent accuracy. It provides the essential mechanical foundation for professional-grade sewing operations.

Technical Specifications

Model Identifier	411005
Series Code	K275

Key Features

Primary Capabilities

- Heavy-duty fabric handling
- Precision needle bar mechanism
- Adjustable thread tensioning
- Integrated feed dog system

Industry Applications	Apparel Manufacturing, Textile Production, Heavy-Duty Stitching
