Product Overview

Industrial Long Span Racking

This industrial long span racking system is engineered for high load capacity and structural stability in diverse warehouse environments. It features a versatile modular design with adjustable heights, utilizing a non-toxic electrostatic spraying finish for enhanced durability and environmental safety. The system is built for heavy-duty applications, incorporating advanced structural mechanics such as U-shaped uprights and secure eagle-beak column connectors.

Technical Specifications

Adjustment Interval	50 mm
Upright Structure	One-body U-shaped with six bends
Connector Type	Eagle beak column card with safety pin
Surface Treatment	Electrostatic spraying (non-toxic, green)

Certifications & Compliance

Quality Certifications	SGS, BV, TUV, ISO9001
------------------------	-----------------------

Performance Metrics

Available Load Capacities

- Light duty
- Medium duty
- Heavy duty
