

Industrial Solenoid Valve with Stainless Steel Body

This solenoid valve is designed for industrial applications. It features a stainless steel valve body and an orange actuator, with threaded connections for easy installation and remote control of fluid flow.

Product Overview

Industrial Solenoid Valve Solution

This industrial solenoid valve is engineered for high-performance fluid control in demanding environments. Featuring a durable stainless steel body and a high-visibility orange actuator, it provides a robust solution for automated fluid management. Its threaded connection design ensures seamless integration into existing industrial piping infrastructure, offering reliable, remote-controlled flow regulation.

Construction

Body Material	Stainless Steel
Connection Type	Threaded

Performance

Actuator Type	Electrically Operated
