

Industrial Space Disinfection Unit

This mobile unit is designed for industrial space disinfection. It features a control panel, display, and key switch, mounted on a wheeled platform.

Overview

Industrial-Grade Sterilization

This industrial space disinfection unit is engineered for effective air purification and sterilization in controlled environments. Equipped with a mobile wheeled platform for superior portability, the device offers professional-grade performance for maintaining hygienic standards. It features an integrated control panel with a digital display and physical key switch for secure, reliable operation.

Technical Specifications

Control Interface

- Digital Display
- Key Switch Operation
- Status Indicator Lights

Device Type	Oxygen Atomizer Type
Mobility	Wheeled Platform, Industrial Design
