

Industrial Stand Fan with Adjustable Height

This industrial stand fan is designed for powerful and efficient air circulation. Featuring a robust metal construction, it ensures durability and stability.

Product Overview

Industrial Air Circulation Solution

This industrial stand fan is engineered for powerful and efficient air circulation in demanding environments. Built with robust metal construction, it offers exceptional durability and stability for heavy-duty use. The adjustable height settings and multi-blade design allow for customized, high-volume airflow, making it an ideal cooling solution for workshops, warehouses, and large industrial spaces.

Physical Characteristics

Construction Material	Robust Metal
Base Design	Sturdy, Anti-tip Base

Performance Features

Blade Design	Multi-blade system for maximized air movement
Adjustability	Adjustable Height, Customizable Airflow

Application

Recommended Use

- Workshops
- Warehouses
- Large Industrial Spaces
