

Industrial Steering and Transmission Tire

This heavy-duty industrial tire is designed for steering and transmission applications. It features a robust tread pattern for enhanced traction and durability in demanding environments.

Product Overview

Industrial Steering and Transmission Tire

This heavy-duty tire is specifically engineered for demanding steering and transmission applications in industrial environments. Its robust tread pattern ensures superior traction and enhanced durability, even under challenging operational conditions. Constructed from high-quality materials, this tire is built to effectively withstand heavy loads while maintaining exceptional resistance to wear and tear.

Technical Features

Build Quality

Heavy-duty • High-quality materials

Primary Application

Steering, Transmission

Performance

Performance Metrics

- Enhanced traction in demanding environments
- High load-bearing capacity
- Advanced wear and tear resistance
