

Industrial Trapezium Grinding Mill

The MTM Medium Speed Trapezium Mill is an industrial grinding mill. It is designed for efficient material processing in a variety of applications.

Product Overview

Industrial Trapezium Grinding Mill

The Industrial Trapezium Grinding Mill is a high-performance solution engineered for efficient material processing in heavy industrial applications. Designed to handle diverse grinding requirements, this mill offers robust construction and reliable operation for consistent output. Its advanced design ensures optimal energy efficiency and durability, making it an essential asset for mining, construction, and mineral processing facilities seeking to improve their grinding throughput.

Technical Specifications

Mill Type	Trapezium Grinding Mill
Application Suitability	Mining, Mineral Processing, Construction Materials, Industrial Grinding

Performance Metrics

Key Performance Indicators

100 % Efficiency Rating	24 h/day Operational Duty Cycle
-----------------------------------	---

Design Features

Design Highlights

- Trapezium-shaped grinding roller and ring design
- Robust heavy-duty frame construction
- Optimized material flow path
- High wear-resistance components
