

Industrial Valves and Parts Assortment

These industrial valves conform to American, BS, DIN, and JIS standards. The valves are suitable for marine, industrial, and water systems.

Product Overview

Professional Industrial Valve Solutions

This comprehensive collection offers a wide range of industrial valves designed for demanding applications across marine, industrial, and water systems. Our assortment includes gate, ball, butterfly, check, angle, vacuum, and relief valves, alongside various strainers to meet diverse operational needs. Built to international standards, these components are available in multiple high-performance materials to ensure durability and reliability in specialized environments.

Technical Standards

Compliance Standards

American Standard, BS Standard, DIN Standard, JIS Standard

Materials and Construction

Material Composition

- Carbon steel
- Cast iron
- Ductile iron
- Stainless steel
- Alloy steel
- Copper Alloy (Lead-free available)
- Bronze
- Brass
- PVC

Valve Types

Available Valve Configurations

- Gate valves
- Ball valves
- Butterfly valves
- Check valves
- Angle valves
- Globe valves
- Plug valves
- Relief valves
- Tapping valves
- Vacuum valves
- Strainers

Customization Services

Custom Production Capabilities

- Punching/Stamping
- Forming
- Turning
- Casting
- Forging
- Welding
- Extrusion
- Flame/Laser/NC Cutting
- Precise Machining
