

Industrial Ventilation Fan

This industrial ventilation fan is designed for efficient air extraction in factories and warehouses. Its robust construction features durable metal components and aerodynamically optimized blades for maximum airflow.

Overview

High-Performance Industrial Ventilation

This industrial exhaust fan is engineered with galvanized steel housing, offering exceptional resistance to rust and heat for long-lasting durability in demanding environments. Designed for efficiency, the unit combines a high-quality motor with aerodynamically optimized blades to deliver significant air volume while maintaining low noise levels. It serves as an ideal ventilation solution for a wide range of commercial, industrial, and agricultural applications, including factories, warehouses, and farms.

Key Features

Suitable Applications	Commercial, Industrial, Agricultural, Warehouses, Factories, Workshops
Housing Material	Galvanized Steel

Technical Specifications

Model Comparison Table

Model	Power (W)	Air Volume (m³/h)	Rotation (RPM)	Current (A)
GFP14	220	1400	1380	1.9
GFP18	300	2800	1100	2.7
GFP30	570	5500	1050	5.2
