

Industrial Ventilation Unit

This metallic unit is designed for refrigeration and ventilation purposes. It features a perforated grille for air intake/exhaust and a slotted vent for directional airflow.

Product Overview

Industrial Ventilation Unit

This industrial-grade ventilation unit is engineered for high-performance air management in refrigeration and ventilation applications. Constructed from durable, high-quality brushed metal, it features a robust design with integrated perforated air intake grilles and directional airflow vents. Its design ensures reliable operation in demanding commercial or industrial environments.

Technical Construction

Key Features

- Perforated bottom air intake grille
- Slotted top directional airflow vent
- Industrial-grade housing
- Corrosion-resistant metallic finish

Material	Stainless Steel, Brushed Metal, Aluminum
-----------------	--

Applications

Primary Applications

Commercial Refrigeration • Industrial Ventilation • HVAC Systems
