

Industrial Water Transfer Pump

This water pump is designed for various industrial and agricultural applications. It features a durable construction with a cast iron casing and impeller for long-lasting performance and resistance to corrosion.

Overview

Industrial Water Transfer Pump

This industrial-grade water transfer pump is engineered for robust performance in demanding agricultural and industrial environments. Featuring a durable cast iron construction with a corrosion-resistant impeller, it ensures reliable and consistent fluid transfer. The unit is powered by a high-efficiency electric motor and is designed for straightforward maintenance to minimize operational downtime.

Technical Construction

Casing Material	Cast Iron
Impeller Material	Cast Iron
Power Source	Electric Motor

Performance Features

Suitable Applications

- Industrial water transfer
- Agricultural fluid management
- Demanding environmental fluid transport

Key Attributes	High-Efficiency, Corrosion-Resistant, Easy Maintenance
