

Inflatable Throw-Over Board Emergency Life Raft

This inflatable emergency life raft is designed for throw-over-board deployment from a max storage height of 18-36m. It features a durable double-tube construction, automatically erecting canopy, boarding ramps, ballast bags and internal lighting.

Product Overview

Professional Marine Emergency Life Raft

This throw-over-board inflatable life raft is engineered for reliable emergency response and maritime survival. Featuring a robust double-tube construction, it ensures exceptional stability and buoyancy in challenging sea conditions. The unit is designed for rapid deployment and includes an automatic canopy for occupant protection and enhanced visibility.
