

Infrared Surveillance Camera

This is a high-performance infrared camera designed for surveillance and security applications. It is equipped with a durable weatherproof housing for reliable outdoor use and supports various video output formats.

Overview

Advanced Infrared Surveillance

This high-performance infrared camera is engineered for robust security and surveillance applications. It features advanced image processing capabilities designed to ensure clear visibility even in challenging low-light conditions. Built with a durable, weatherproof housing, this unit is suitable for reliable operation in various outdoor environments. It supports multiple video output formats, offering broad compatibility with existing recording and monitoring systems.

Technical Specifications

Series	Infrared Wisdom Bright Technology
Model Number	ZH-910
Suitable Applications	Residential, Commercial, Industrial

Key Features

Key Capabilities

- Low-light visibility optimization
- Weatherproof construction
- Advanced image processing
- Multi-format video output

Environment

Outdoor Ready • Weatherproof
