

Infrared Thermal Imaging Camera

This infrared thermal imaging camera captures thermal images. It is a compact and portable device suitable for applications like thermal imaging and surveillance.

Product Overview

Professional Thermal Imaging

The PA-99I series infrared ray camera provides high-performance thermal imaging capabilities suitable for professional applications. Designed for reliability and precision, this device is engineered to capture detailed thermal data in a compact, portable form factor. It is an ideal solution for users requiring consistent infrared monitoring and diagnostic capabilities.

Technical Specifications

Series	PA-99I
Device Type	Infrared Thermal Imaging Camera
Design Features	Compact, Portable, Mountable
