

Injection Molding Machine

This injection molding machine is designed for precision plastic part manufacturing. The robust machine features a high-speed injection unit, a rigid clamping system, and an advanced control system for optimal process control and repeatability.

Overview

High-Performance Injection Molding Solution

This injection molding machine is designed for precision manufacturing of plastic components. It features a robust clamping system and a high-speed injection unit to ensure optimal process repeatability. Suitable for diverse thermoplastic materials, this system offers efficient performance for industrial applications.

Technical Specifications

Performance Metrics

150 ton

Clamping Force

460 mm

Opening Stroke

Injection Parameters

Screw Diameter (mm)	Shot Weight (g)	Injection Capacity (cm3)
45	325.5	357.6
50	401.8	441.5
55	486.2	534.3
