

Inline Check Valve

This inline check valve prevents backflow in fluid systems. It ensures unidirectional flow, maintaining system integrity.

Product Overview

High-Efficiency Performance

This high-efficiency unit is designed for residential and light commercial heating and cooling systems. It features a robust motor for reliable performance and a compact design that ensures easy installation in tight spaces. Ideal for diverse applications, it provides quiet operation and a long service life.

Technical Specifications

Available Models

- 1.5DK-20
- 2DK-20

Applications

Suitable Applications

Radiant Heating, Domestic Hot Water Recirculation, Chilled Water Systems

Key Features

Operational Benefits

Quiet Operation • Compact Design • Robust Motor • Long Service Life
