

Insect Residue Removal Cloth for Vehicle Cleaning

This cleaning cloth is designed for removing insect residue and dirt from vehicles. The sandwich mesh structure provides enhanced cleaning while being gentle on surfaces, making it ideal for streak-free cleaning.

Product Overview

Specialized Cleaning Performance

This Insect Sandwich Mesh cleaning cloth is engineered specifically for the effective removal of stubborn insect residue and dirt from vehicle glass and painted surfaces. Its unique sandwich mesh structure provides enhanced scrubbing power while remaining gentle enough to prevent surface damage. Designed for professional detailing and microfiber cleaning, it ensures a streak-free finish for a pristine vehicle appearance.

Technical Specifications

Material Composition	80% Polyester, 20% Chinlon
Fabric Weight	240 GSM
Dimensions	40 x 40 cm
