

Integrated Compact Fluorescent Lamp

These integrated lamps combine the bulb and ballast into a single unit for easy installation. They provide energy savings and a longer lifespan compared to traditional incandescent options.

Product Overview

Integrated Compact Fluorescent Lamp

These integrated compact fluorescent lamps (CFLs) provide an energy-efficient alternative to traditional incandescent lighting. By combining the bulb and ballast into a single, cohesive unit, they ensure straightforward installation into standard light fixtures. Designed for both residential and commercial environments, these lamps deliver significant energy savings and an extended operational lifespan.

Technical Specifications

Base Type	Standard screw base
Design Features	Integrated Ballast, Energy Efficient, Standard Screw Base

Performance

Suitable Applications

- Residential Lighting
- Commercial Lighting
