

Interactive LCD Electronic Whiteboard

Interactive LCD whiteboard is designed for presentations and collaborative work. It features touch-screen technology for writing and drawing.

Overview

Interactive LCD Electronic Whiteboard

This interactive electronic whiteboard features a high-brightness liquid crystal display with advanced LED backlighting technology. Designed for durability and consistent performance, the screen maintains its brightness levels even after extended periods of use. It serves as an ideal solution for collaborative environments, including classrooms, conference rooms, and professional training facilities.
