

Internal Circlip Pliers with Straight Tips

These internal circlip pliers are designed for installing and removing internal circlips or snap rings. The pliers feature precision tips for secure grip and easy maneuverability.

Product Overview

Professional Grade Internal Circlip Pliers

These internal straight circlip pliers are engineered for the efficient installation and removal of internal snap rings. Constructed from robust 45# carbon steel, they feature induction-hardened cutting edges to ensure durability and longevity in demanding industrial environments. Designed with user comfort in mind, the two-tone dipping handles provide an ergonomic grip for better control during precise mechanical tasks.

Material & Construction

Material	45# Carbon Steel
Surface Finish	Phosphate, Black Finish

Design & Ergonomics

Handle Design	Two-tone dipping handle
Tip Configuration	Straight

Performance Features

Hardening Process	Induction hardening on cutting edge
-------------------	-------------------------------------

Applications

Typical Applications

- Automotive repair
- Mechanical assembly
- Industrial maintenance
