

Internal Dial Caliper Gauges

These internal dial caliper gauges are designed for taking precise internal measurements. Several models are available, offering different measurement ranges and depths.

Product Overview

Precision Internal Measurement

These specialized inside dial caliper gauges are engineered for accurate internal measurement tasks. Designed for versatility, the series includes multiple models to accommodate various dimensional requirements. They are highly adaptable, with options for custom design based on the specific dimensions of the parts needing verification.

Technical Specifications

Model Specifications

Model	Range (mm)	Depth (mm)	Graduation (mm)
TNK-1	15-35	90	0.01
TNK-2	95-115	120	0.01
TNK-3	10-60	125	0.05

Service & Customization

Custom Manufacturing

The design of these dial caliper gauges is not confined to standard models. Units can be specially designed and manufactured based on unique user demands or the specific geometry of parts provided by the user.
