

# Inverter DC MMA MIG Welder

This inverter-based DC MMA (Manual Metal Arc) welder is suitable for welding metal plates with a thickness above 0.8mm. It features high welding speed and improved welding quality.

## Product Overview

### Professional Inverter DC MMA/MIG Welder

This versatile inverter-based welding machine is engineered for high efficiency and precise control in various metalworking applications. It features advanced voltage fluctuation compensation to ensure a stable current during operation, resulting in deep melting pools and minimal spatter. Designed for ease of use, it offers high welding speeds and reliable arc-starting, making it a practical choice for working with carbon steel, alloy steel, and mild steel.

## Technical Capabilities

### Performance Metrics

**0.8 mm**

Min. Plate Thickness

### Compatible Materials

Carbon Steel, Alloy Steel, Mild Steel

## Key Features

### Operational Benefits

- High welding speed
- Improved arc-starting success rate
- Voltage fluctuation self-compensation
- Minimal spatter
- Deep melting pool capability
- Double-face molding support

### Efficiency Status

High Efficiency • Cost Effective
