

iPhone Lightning Data and Charging Cable

This iPhone lightning cable supports both data synchronization and rapid charging. Most cellphones can be fully charged within a short time thanks to its high-speed data transmission.

Product Overview

High-Performance Lightning Cable

This Lightning data and charging cable is designed for reliable connectivity, supporting both high-speed data transfer and rapid charging for compatible devices. Engineered with a durable construction featuring 50 pieces of pure copper core and eco-friendly TPE material, it offers enhanced resistance to fraying. The 1-meter length provides flexible usage options, making it an ideal choice for both desktop and mobile charging setups.

Technical Specifications

Cable Length	1 m
Material Composition	Pure Copper Core, TPE
Copper Core Count	50
