

IPL Hair Removal Device with Ice Cooling

This IPL hair removal device uses intense pulsed light technology to target hair follicles at the root, inhibiting future hair growth. The integrated ice cooling feature provides a cooling sensation during treatment, minimizing discomfort and reducing skin irritation.

Overview

Professional IPL Hair Removal Solution

This advanced IPL hair removal device offers a permanent solution for hair reduction through targeted light therapy. Engineered with an integrated 'Ice Feeling' cooling head, it ensures a comfortable treatment experience by minimizing heat sensation and skin irritation. The device features intelligent skin tone sensors and six adjustable energy levels, providing a safe and personalized hair removal process for various skin conditions.

Performance Metrics

Lamp Lifespan

300000 flashes

Total Shoots

Shooting Interval	0.8s - 3s
Window Energy	5 J/cm ²

Technical Specifications

Power Rating	24 W
Input Voltage	100-240V / 50-60Hz
Output Voltage	12V DC 3A
Dimensions	145 x 77 x 220 mm
Treatment Window Size	3 cm ²

Features

Core Features

- Intelligent skin color and distance sensing
- 6-level adjustable energy shooting
- Auto-suggested mode based on skin condition
- Integrated LCD display
- Ice-cooling head technology

Device Capabilities	Permanent Hair Removal, Skin Tone Detection, Cooling Technology, Quartz Lamp
