Product Overview

ISO 30 Tool Changer Forks

These replacement tool holder fingers are designed for automatic tool changers, providing a secure and reliable grip for ISO 30 tool holders. Constructed from high-quality imported reinforced plastic with an internal alloy steel block casting, these components are built for durability and high-speed performance. They are essential for maintaining efficient and accurate tool management in CNC machining and woodworking operations.

Technical Specifications

Dynamic Balance Grade	G2.5
Maximum Rotation Speed	30000 rpm
Yaw Precision	0.005 mm

Construction & Materials

Reinforcement Features

- Internal alloy steel block casting
- Steel positioning pins
- High loading capacity structure

Material Composition	Reinforced Plastic, Alloy Steel Block, Anti-explosion
----------------------	---

Compatibility & Usage

Tool Standard	ISO 30
Application Types	CNC Routers, Automatic Tool Changers (ATC), Woodworking Machines
