Overview

High-Performance Diesel Power Solution

This robust diesel generator set is engineered for reliable prime and standby power generation in demanding industrial and commercial environments. It features a durable, soundproof enclosure designed for quiet operation and long-term outdoor use. Equipped with comprehensive safety and maintenance features, this unit ensures consistent performance and ease of handling for professional applications.

Performance

Noise Level

85 dBA

Noise Level

Measured at 1M distance at 100% full load

Prime Rating 25 kVA

Construction & Enclosure

Acoustic Insulation Details

Feature	Specification
Material	High efficiency mineral wool
Thickness	5.0mm
Covering	Stainless Steel Punching Plate
Canopy Material	Galvanized steel plate (2mm)
Finishing Process	Electrostatic spraying with outdoor powder coating
Base Frame Material	Carbon steel (10mm)

Components & Hardware

Included Accessories

- Battery
- Battery switch
- Battery charger

Hardware Material

Stainless steel (bolts, nuts, hinges)

Muffler

Customized built-in residential high-performance

Handling & Logistics

Handling Features

Top lifting points, Forklift pockets, Eyelets

Compliance

Certifications
