

# JIS 10K Globe Valve with WCB Body

This globe valve is designed to regulate flow in piping systems. It is suitable for applications in oil fields, chemical plants, and coal mines.

## Product Overview

### Industrial JIS 10K Globe Valve

This globe valve is engineered to meet rigorous JIS standards for industrial fluid regulation. Constructed with a robust WCB (Weldable Cast Carbon Steel) body, it is specifically designed to handle high-temperature and high-pressure service environments. Featuring a manual handwheel for precise flow control, this valve offers reliable performance and durability for demanding piping systems.

## Technical Specifications

### Pressure Rating

10K

### Available Size

- 100A

### Body Material

WCB (Weldable Cast Carbon Steel)

### Connection Type

JIS Flange

## Operational Features

### Operation

Manual Handwheel

### Design Standards

JIS
