

JIS Swing Check Valve

This swing check valve is engineered to prevent backflow within piping systems. Its robust design incorporates flanged ends, ensuring a secure connection and dependable performance across diverse industrial applications.

Overview

JIS Swing Check Valve

This JIS swing check valve is engineered to effectively prevent backflow in industrial piping systems. Featuring a robust, durable construction with flanged ends, it ensures a secure and reliable connection. The swing mechanism is designed for smooth operation and minimal pressure drop, adhering to JIS standards for dimensional accuracy and performance.

Technical Specifications

Pressure Rating

10 K

Pressure Class

Key Features

- Prevents backflow
- Robust construction
- Minimal pressure drop
- JIS standard compliant

Material Grades

SCS13, SCS14, Stainless Steel

Connection Type

Flanged
