

Keel Forming Machine

This high-speed keel machine is designed for efficient and precise manufacturing. The machine features a robust construction with multiple forming stations, ensuring consistent and accurate keel profiles.

Overview

High-Speed Keel Forming Solution

This high-speed light keel roll forming machine is engineered for efficient and precise manufacturing of various steel profiles. With a production speed of 70m/min, it offers high throughput for large-scale operations while minimizing material waste. The robust construction and advanced control mechanisms ensure consistent and accurate profiles, making it an ideal solution for modern construction requirements.

Performance

Production Speed

70 m/min
Line Speed

Capabilities

Supported Profiles

Omega, Stud, Track, 38 Main, 50 Furring, Angle

Technical Features

Build Quality

- Robust construction with multiple forming stations
- Powerful drive system
- Advanced control mechanisms
- Automated feeding system
- Integrated safety covers and guards
- Emergency stop functionality
