

Kerosene Blow Torch

This kerosene blow torch is designed for generating a high-temperature flame for various heating and soldering applications. It features a fuel tank, burner assembly, and controls for flame adjustment.

Product Overview

Professional Kerosene Blowlamp

This robust kerosene blowlamp is engineered for high-temperature heating and soldering applications. Featuring a durable fuel tank and a precision-engineered burner assembly, it offers reliable performance for industrial and workshop tasks. The integrated pump system allows for efficient pressurization, while the adjustable control valve ensures precise flame management for various operational needs.

Technical Specifications

Typical Applications

- Metal Soldering
- General Heating
- Industrial Maintenance

Model Identifier	MD 25
Fuel Source	Kerosene
Core Components	Manual Pump, Control Valve, Preheating Cup, Support Frame
