

Key-Operated Brass Ball Valve

This ball valve controls the flow of fluids in industrial and plumbing applications. It is made from durable brass and features a key-operated mechanism for security.

Product Overview

Key-Operated Brass Ball Valve

This brass ball valve is engineered for reliable flow control in demanding industrial and plumbing environments. Featuring a robust brass construction, it offers excellent corrosion resistance and long-term durability. The integrated key-operated mechanism provides an essential security feature, restricting valve operation to authorized personnel only.

Technical Specifications

Handle Color

Green

Material

Brass

Operation Mechanism

Key-Operated

Features

Typical Applications

- Industrial fluid control
- Plumbing systems
- Secure flow regulation

Security Features

Key-Operated, Access Control, Authorized Personnel Only
