

Key-Operated Emergency Stop Push Button Switch with Red Mushroom Actuator

This key-operated emergency stop push button switch features a red mushroom-shaped actuator. It is designed for elevator applications and provides a reliable means of halting equipment operation in emergency situations.

Overview

Industrial Emergency Stop Switch

The LAY4-ES142 is a high-performance, key-operated emergency stop push button switch featuring a distinct red mushroom-shaped actuator. Designed for critical safety applications in elevators and industrial machinery, this switch offers reliable power interruption and a secure key-reset mechanism to prevent unauthorized restarts. Built with a zinc alloy body and high-grade anti-flame materials, it ensures durability and safety compliance in demanding environments.

Electrical Specifications

Rated Insulation Voltage	600 V
Conventional Heating Current	10 A
Insulation Resistance	e5M©
Contact Resistance	d25n©
Power Frequency Withstand Voltage	AC 2.5KV/min

Performance Metrics

Mechanical Life

1000000 cycles
Pushbutton

500000 cycles
Selector Switch

Electrical Life

5000000 cycles
Pushbutton

250000 cycles
Selector Switch

Compliance & Standards

Applicable Standards

- GB/T14048.1
- IEC60947-5-1

Certifications

CE, ISO9001, ROHS, UL

Technical Details

Construction Materials

Zinc Alloy • Anti-flame Plastic • Silver Alloy Contacts

Operational Suitability

Suitable for AC circuits up to 660V/60Hz and DC circuits below 400V. Ideal for control signals, interlocking, and emergency warning systems in industrial control panels.
