

Keypad Feature Phone

This is a mobile phone with a keypad and screen, featuring a metallic finish. The device appears to be a feature phone rather than a smartphone, given the presence of a physical keypad.

Product Overview

Reliable Communication Solution

The MD4 Edge+ is a robust feature phone designed for straightforward, reliable communication. Featuring a classic physical keypad layout, it offers a tactile and intuitive user experience suitable for professional environments where simplicity is key. The device is encased in a durable metallic finish, ensuring it stands up to daily use while maintaining a professional aesthetic.
